

Resistivity Meter TR-110

Features

- ✓ Measuring surface resistivity and resistance (Ω): $10^3 \sim 10^5$ (Conductive), $10^6 \sim 10^{11}$ (Static Dissipative), 10^{12} (Insulative)
- ✓ Using 10 LEDs to indicate test result
- ✓ Compact design, easy to carry, simple operation
- ✓ High sensitivity, giving immediate indication of surface resistivity value (Ω)
- ✓ Manufactured in compliance with U.S. ASTM-D-257 standard of parallel bar sensing

Specifications

Measurement range	$10^3 \Omega \sim 10^{12} \Omega$
Display accuracy	± 0.5
Meter size	70x27x130mm
Net weight	140g
Battery	9V 6F22
